Software Development Plan (Small Project)

1. Introduction

1.1 Purpose

The purpose of the *Software Development Plan* is to gather all information necessary to control the project. It describes the approach to the development of the software and is the top-level plan generated and used by managers to direct the development effort.

The following people use the *Software Development Plan*:

- The **project manager** uses it to plan the project schedule and resource needs, and to track progress against the schedule.
- **Project team members** use it to understand what they need to do, when they need to do it, and what other activities they are dependent upon.

1.2 Scope

This *Software Development Plan* describes the overall plan to be used by the **ConnectMe** project, including deployment of the product. The details of the individual iterations will be described in the Iteration Plans.

The plans as outlined in this document are based upon the product requirements as defined in the *Vision Document*.

1.3 Overview

This *Software Development Plan* contains the following information:

- Project Overview — provides a description of the project's purpose, scope, and objectives. It also defines the deliverables that the project is expected to deliver.
- Project Organization — describes the organizational structure of the project team.

2. Project Overview

2.1 Project Purpose, Scope, and Objectives

This project aims to build a website that enables users to either donate or receive donations from others. Specifically, our website allows donors to post **donating records** of their items whilst recipients will be able to post **receiving records** to specify their needs. The process of matching donors with appropriate recipients will be monitored and supported by collaborators. Overall, by trying to facilitate the process of donating and receiving donations, the project wishes to contribute to a more compassionate and caring society where people are more willing to help each other out in times of need.

2.2 Assumptions and Constraints

- Budget: 40 million VND
- Staff: Project Manager (PM), Team Leader, Architect, Designer, Developer (Dev), Tester
- Device: Laptop, Smartphone
- Schedule: 12 weeks as specified in section 4.2.3 Project Schedule

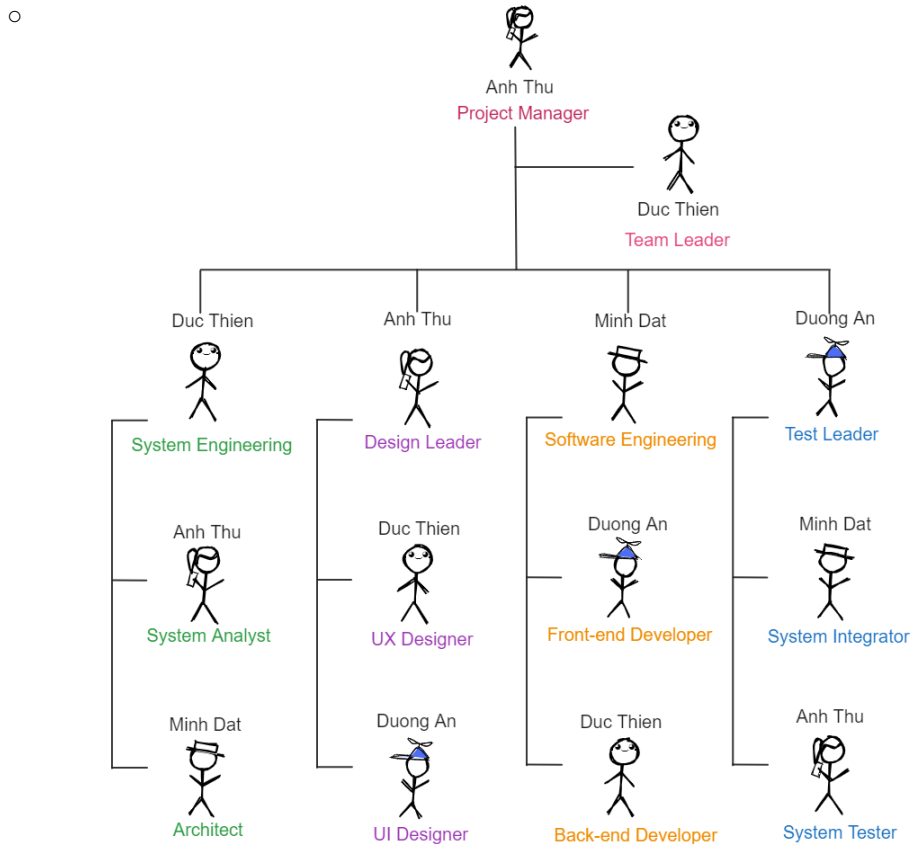

2.3 Project Deliverables

- Deliverables for each project phase are identified in the Development Case.
- Deliverables are delivered towards the end of the iteration, as specified in section 4.2.4 Project Schedule.

4.3 Project Monitoring and Control

4.3.1 Requirements Management

The requirements for this system are captured in the Vision document. Requested changes to requirements are captured in Change Requests, and are approved as part of the Configuration Management process.

4.3.2 Reporting and Measurement

- Updated cost and schedule estimates, and metrics summary reports, will be generated at the end of each iteration.
- The Minimal Set of Metrics, as described in the RUP [Guidelines: Metrics](#), will be gathered on a weekly basis. These include:
 - Earned value for completed tasks. This is used to re-estimate the schedule and budget for the remainder of the project, and/or to identify need for scope changes.
 - Total defects open and closed – shown as a trend graph. This is used to help estimate the effort remaining to correct defects.
 - Acceptance test cases passing – shown as a trend graph. This is used to demonstrate progress to stakeholders.
 - In addition, overall costs will be monitored against the project budget.

4.3.3 Risk Management

Risks will be identified in the Inception Phase using the steps identified in the RUP for Small Projects activity “Identify and Assess Risks”. Project risk is evaluated at least once per iteration and documented in this table. The risks of the greatest magnitude are listed first in the table.

| Risk Ranking (High, Medium, Low) | Risk Description and Impact | Mitigation Strategy and/or Contingency Plan |
|-------------------------------------------|-----------------------------|------------------------------------------------------------------------------------------------------|
| Requirement change | High | Frequent updates with team members and implement prototype for feedbacks before official launching |
| Team member illness | Medium | Flexibly assign tasks for team members and make sure that everyone understand the basic of all tasks |
| School's exam | Medium | Plan ahead and prioritize up-coming exams |
| New technology | Medium | Update and discuss regularly with team members, time reserved for training |
